SUMMARY

Junior Full-Stack Developer with strong expertise in building scalable web applications and integrating AI-powered chatbots. Proven ability to develop innovative solutions, demonstrated by first-place award for a real-time emergency ambulance dispatch system at university competition. Skilled in React, Node.js, Java, and PostgreSQL with hands-on experience in backend and frontend development. Eager to contribute to impactful technology projects.

SKILLS

React
Node.js
Java
Postgres
JavaScript
Git
GitHub
REST APIs
CSS3
HTML5
Python
PHP
Problem-Solving
Team Collaboration
Communication
Adaptability

LANGUAGES

Amharic

WORK EXPERIENCE

Software Engineer, *Yosti Import and Export co.ltd*
09/2026 – Present | China
Maintaining and improving Company websites, applications, and digital platforms.
• Troubleshooting, debugging, and resolving technical and software-related issues.
• Participating in software planning, system design, and implementation.
• Ensuring the security, performance, and reliability of Company systems.

Full-Stack Developer (Project), *ABJ Tutorial*
2026 | Remote
- Architected and developed a full-stack educational platform, providing tutorial content and registration functionality to a growing user base.
- Designed and implemented a normalized **PostgreSQL** database schema to manage user accounts, course enrollments, and content delivery, ensuring data integrity and fast query performance

AI & Backend Developer (Intern), *Ministry of Innovation and Technology*
06/2025 – 09/2025 | Addis Ababa
Designed and implemented a PostgreSQL database schema to securely store innovator profiles and funding applications.

- Collaborated with frontend developers to define API endpoints, ensuring seamless data flow between backend services and the user interface.

EDUCATION

Jimma University, *BSc in Computer Science*
2022 – 2026 | Jimma, Ethiopia
Jimma Institute of Technology

- Relevant coursework: Data Structures, Database Management Systems, Web Programming, and Software Engineering.

AWARD-WINNING PROJECT

Erdataye – Emergency Ambulance Dispatch App,
JIT Final Year Project Competition (1st Place)
2026
- Built a real-time emergency response web application that matches patients to nearby ambulances using geolocation.
- Developed pre-filled medical profiles (allergies, blood type, chronic conditions) for rapid paramedic access, potentially saving critical minutes in emergencies.
- Recognized with a Certificate of Excellence and publicly lauded by the Dean of the Faculty of Computing & Informatics for social impact.
- Integrated a mapping API to calculate distance and route ambulances to the patient's exact location.
